## DETAILED ACTION

This is in response to a letter for patent filed on March 29<sup>th</sup>, 2000 in which claims 1-37 are presented for examination. Claims 1-37 are pending in the letter.

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 1 recites the limitation "the handling" in paragraph 1 line 1. There is insufficient antecedent basis for this limitation in the claim.

### *Claim Rejections - 35 USC § 102*

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3621

5. Claims 1-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Noblett Jr. et al. (U.S. Patent No 5,432,326 (*applicant IDS*)).

6. As per claim 1, Noblett Jr. et al teach a system for facilitating the handling of a transactional dispute (*dispute regarding transaction*) comprising: at least one access terminal (*back office computer, 57*) having a display and an input means (*see fig 2*); a central server (*host computer, 40*) having an Internet web site stored thereon, the display capable of displaying a plurality of dispute handling forms retrieved from the server and the web site (*see fig 2*) a communication channel (*LAN, 58a, 58b*) linking the terminal to the web site and the server to the web site; and a scanner (*embossed data reader, 38*), coupled to the terminal, the scanner able to transform an image into computer readable format for transmission across the communication channel (*see fig 10, and fig 15, also, column 4 lines 24-55*)).

7. As per claims 2, 4, Noblett Jr. et al teach a system comprising a first access terminal for a dispute initiator/issuer and a second access terminal for a dispute responder/acquirer ((*see fig 1, 2*)).

8. As per claims 3, 5, Noblett Jr. et al teach a system comprising a form selection for a dispute initiator and a form selection for a dispute responder wherein the form selection for the initiator comprises a Retrieval Request , a First Chargeback and a Final Chargeback; and the form selection for the responder comprises a Fulfillment and a Second Presentment ((*see fig 10, and fig 15, also, column 4 lines 24-55*)).

Art Unit: 3621

9. As per claim 6, Noblett Jr. et al teach a system comprising a third access terminal for administration and a fourth access terminal for finance ((*see fig 1, 2*).

10. As per claim 7, Noblett Jr. et al teach a method for handling a dispute between an Issuer (*card issuing, 18a*) and an Acquirer (*merchant, 16*) via an Internet connection (*network, fig 12*) to which are coupled at least one access terminal (*host computer 40, back office computer 57, card issuer computer 19a*) (*see fig 1, 2*), the method comprising accessing an Internet web site from the terminal, the web site linked to a server comprising a plurality of dispute handling forms stored thereon choosing one of the dispute handling forms, responding to the requested field information on the form, sending the form over the Internet connection to be routed by the server to a disputed party; and repeating steps (a)-(d) for both the Issuer and the Acquirer (*see fig 10, and fig 15, also, column 4 lines 24-55*).

11. As per claim 8, Noblett Jr. et al teach a method further comprising at least one document scanning device and scanning at the document scanning device at least one supporting document; and sending the supporting document along with the form over the Internet connection to be routed by the server to a disputed party ((*see fig 1, 2*).

12. As per claim 9, Noblett Jr. et al teach a method wherein the scanning comprises one to five supporting documents ((*see fig 1, 2*).

13. As per claim 10, Noblett Jr. et al teach a method further comprising reviewing a report comprising the form by financial operations; and transferring liability in response to the report to

Art Unit: 3621

at least one of the Issuer from Acquirer and the Acquirer from the Issuer (*see fig 10, and fig 15, also, column 4 lines 24-55*).

14. As per claim 11, Noblett Jr. et al teach a method of requesting a User ID from administrative operations; and receiving the User ID and a password (*see fig 10, and fig 15, also, column 4 lines 24-55*).

15. As per claim 12, Noblett Jr. et al teach a method wherein the choosing one of the dispute handling forms comprises choosing from a form selection for the Issuer and a form selection for the Acquirer (*see fig 10, and fig 15, also, column 4 lines 24-55*).

16. As per claim 13, Noblett Jr. et al teach a method wherein the form selection for the issuer comprises a Retrieval Request, a First Chargeback and a Final Chargeback; and the form selection for the Acquirer comprises a Fulfillment and a Second Presentment (*see fig 10, and fig 15, also, column 4 lines 24-55*).

17. As per claim 14, Noblett Jr. et al teach a method wherein the sending step comprises one of viewing and downloading by the disputed party (*see fig 10, and fig 15, also, column 4 lines 24-55*).

18. As per claim 15, Noblett Jr. et al teach a method executed in a network computer system for facilitating handling of transactional disputes, the network computer system having a server and at least one access terminal ((*see fig 1, 2*), comprising accepting at the server a User ID and

Art Unit: 3621

password from a first user at a first access terminal (*see column 14 lines 42-54*), retrieving from the server a set of dispute handling forms which coincide with the User ID (*see column 14 lines 42-54*), displaying the set of first user forms at the first access terminal (*see fig 1, 2*), receiving input entered on one of the first user forms at the first access terminal (*see fig 10, and fig 15, also, column 4 lines 24-55*), transmitting within the network the one of the first user forms to a second user in dispute with the first user (*fig 26, column 54 line 50- 55 line 44*), notifying the second user at a second access terminal of the one of the first user forms (*see fig 10, and fig 15, also, column 4 lines 24-55*), accepting at the server a User ID and password from the second user at the second access terminal (*see column 14 lines 42-54*), retrieving from the server a set of dispute handling forms which coincide with the second user User ID (*see fig 1, 2*), displaying the set of second user forms at the second access terminal (*see column 14 lines 42-54*) receiving input entered on one of the second user forms at the second access terminal; transmitting within the network the one of the second user forms to the first user (*fig 26, column 54 line 50- 55 line 44*), notifying the first user at the first access terminal of the one of the second user forms; and repeating steps (a)-(I) until all needed dispute handling forms have been transmitted (*fig 26, column 54 line 50- 55 line 44*).

19. As per claims 16-37, they contain inventive concepts that are identical to claims 1-15. Therefore, they are rejected by the same rationale.

Art Unit: 3621

*Conclusion*

20. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. (*see form 892*).
